

Enter Grades

In this tutorial we will learn where to enter grades.

Once you finish creating and managing the grade categories and items, you may go to enter grades.

A screenshot of the 'User List' page in a learning management system. The page has a header with 'User List' and buttons for 'Import Grades' and 'Export Grades'. Below the header, there are options for 'Display Options' and 'Switch to Spreadsheet View'. A 'View By' dropdown is set to 'User'. A search bar is present with a 'Search' button and a link to 'Show Search Options'. Below the search bar, there is a table with columns for 'First Name ▲, Last Name', 'Review of Revolutionary War', and three 'Quiz' columns (Quiz 1, Quiz 2, Quiz 3). The table shows one user, 'Student, Ondemir', with 0% scores in all categories. The table is paginated with '20 per page'.

This is the place if you are planning to enter grades manually.

In the cases where you linked these grade items to real assignments, the system will automatically transfer the grades into this section after you grade them in the dropbox, discussion, or quizzes. If your quizzes include only multiple-choice and true-or-false questions, these questions can be graded automatically and the scores can be transferred into the gradebook automatically.

If you follow this tutorial you will be able to enter your grades for your D2L course.
