

True-False Questions

In this tutorial we will learn how to create a true or false question.

Step 1. General Setup

Create New: -- Question or Section --

GO

1B. and click go.

1A. First, select the true or false question type in the question library

Section
Question

True or False Question (T/F)
Multiple Choice Question (MC)

in this section.

item from the C

1D. You are required to specify the number of points.

Title: Continents

* Points: 1

Difficulty: 1

1C. You have the option to enter a title but if you don't enter a title your question text will automatically be the title of your question.

We recommend you to enter a title if you have questions with similar question texts that way the title will help you to distinguish the question when you look at the question list.

Difficulty: 1

* Question Text:

1E. You can enter a difficulty level, the difficulty level may be used when you randomize questions, when you randomize questions you can ensure that each student receives the same number of questions of that particular difficulty level.

1F. Next, you are required to enter the question text which is where you will enter the question.

Please make sure you are not using different font sizes and types for different questions. Using different font types and sizes may distract your students.

jpeg, gif, bmp, png

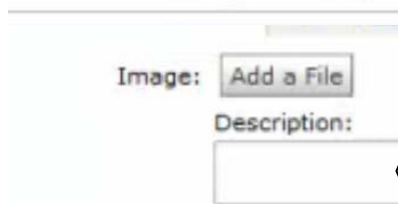

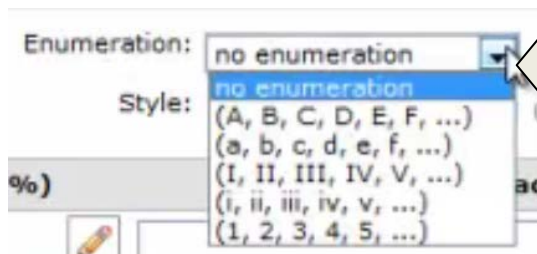

Image:

Description:

Acceptable file formats for images are jpeg, gif, bmp, and png.

1G. The description box will allow the instructor to enter a description for the image. This way those who have a visual impairment will be able to get information about the image using screen reader software.

Step 2. Setting up Options

Enumeration:

Style:

(A, B, C, D, E, F, ...)

(a, b, c, d, e, f, ...)

(I, II, III, IV, V, ...)

(i, ii, iii, iv, v, ...)

(1, 2, 3, 4, 5, ...)

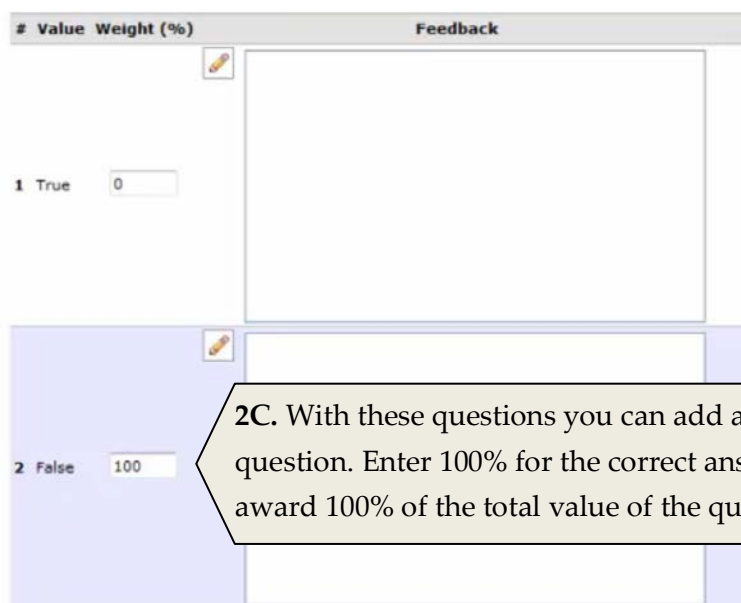

2A. You can also choose a type and style to enumerate your questions.

Style: Vertical Horizontal Drop-down (no HTML formatting)

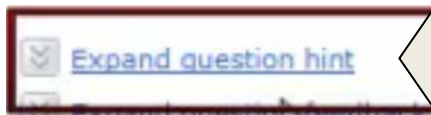

2B. To choose a type click the drop down arrow then to style the question choose a radio button.

The drop-down option creates a drop down arrow allowing the student to choose true or false.

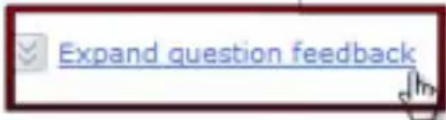

#	Value	Weight (%)	Feedback
1	True	0	
2	False	100	

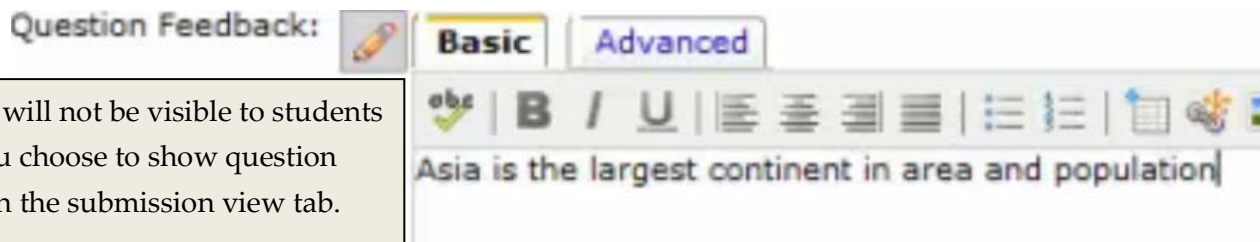

2C. With these questions you can add a weight to the question. Enter 100% for the correct answer. This will award 100% of the total value of the question to the student.

2D. You can add a question hint by clicking on the expansion arrow. You can use hints to guide your students during the exam. To make the hints visible you need to set it up in the properties tab of the quiz.

2E. You can also add a question feedback by clicking on its expansion arrow.

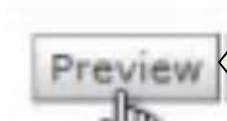

Feedback will not be visible to students unless you choose to show question answers in the submission view tab.

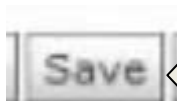

Step 3. Ways to Save and Preview Work

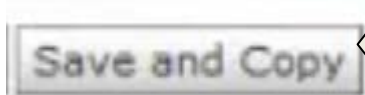

3A. At the top and bottom of your page you can click the preview, save, save and copy, or save and new button.

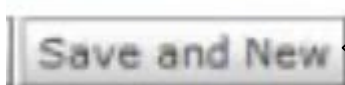

3B. The preview button can be used to see the question from the student and instructor's perspective for grading purposes.

3C. If you are planning to create a different type of question after this one, click the save button.

3D. If you would like to create another true or false question with a similar question text click the save and copy button.

3E. If you would like to create a new true or false question with different information click the save and new button.

In this tutorial we learned how to create true or false questions.
